Manager

June 8, 2022

Congratulations!

As a community you have responded well to the drought situation and have stayed within the restrictions to conserve our irrigation water. Thank You!

"With the recent adjustments to the District's water contracts from a 60% reduction to a 40% reduction, the Board of Trustees passed an amendment on June 1, 2022, changing only the following rules and regulations of its current drought resolution:"

The following regulations take effect June 15, 2022:

- All landscaping, turf, plantings, and gardens are allowed **Two (2) watering portions per week.**

One (1) watering portion is equal to the following:

- 20 minutes (per zone) for pop-up style sprinkler heads,
- 40 minutes (per zone) for rotary-style sprinkler heads,
- 60 minutes (per zone) for drip systems or soaker systems.
- 20 minutes for established trees and shrubs. The hose used for hand watering shall not be left unattended during this watering time, nor shall it be connected to a sprinkler head.

Each watering portion may be split up to better accommodate different types of soil etc. (For example, pop-up sprinklers may be used for twenty (20) minutes per zone OR broken up into two (2), ten (10) minute portions per zone. This allows the user to adjust watering times and days to accommodate the best use of the water on the user's property). *The concept is for each property to be able to use the portion(s) of water to best fit their needs, not to dictate which days or how many days per week to water.*

Weber Basin (our water provider) is constantly reviewing forecasted runoff projections, soil moistures, SNOTEL data, and other pertinent information to insure the water restrictions are appropriate for actual conditions.

For a map of our district boundaries, more information and current restrictions, please visit www.bountifulirrigation.com

If you are not a resident of Bountiful Irrigation District or you water your lawn with culinary water because you do not have access to secondary water, Please disregard this notice and contact your water provider.
