

# BOUNTIFUL IRRIGATION DISTRICT

801-295-5573 • 995 S 500 W • [bountifulirrigation.com](http://bountifulirrigation.com)

## 2023 Irrigation Water Season

We anticipate the irrigation water will turn on beginning **the week of April 24th (west of I-15) and the week of May 1st (east of I-15)**. Each area takes most of the week to fill.

**Property owners west of I-15** should turn their own secondary valve off before April 15th to avoid potential flooding problems.

**Property owners east of I-15** should turn their secondary control or main control valve off (1/4 turn clockwise to close) before April 20th to avoid potential flooding problems.

## Emergencies

If you see water surfacing in the street at any time, please notify Bountiful Irrigation District.

**Monday–Friday 8:00AM to 5:00PM at 801-295-5573.**

**Weekends, Holidays, and after hours:**

**Police Dispatch at 801-298-6000**

## Responsible Water Use

We are grateful for the record amount of snow we received this past winter. That said, we ask the residents to be smart and responsible with their water use. It takes more than one great winter to rid ourselves of the water deficit created by the drought.

**No watering Between 10:00AM—6:00PM is the only restriction on the water use this year; however, we recommend observing the following water schedules:**

- **April 24—June 15:**  
No more than two days per week.
- **June 16—August 31:**  
No more than three days per week.
- **September 1—Seasons End:**  
No more than two days per week.

## Secondary Water Meters

In 2022, the Utah State Legislature passed a bill requiring all secondary water suppliers to install meters on all connections by 2030. Grants and low-interest loans were made available to secondary water districts through the Division of Water Resources.

We secured a grant and a loan to help cover some of the costs required for such a large undertaking. We hired a contractor, and they are currently working on the first phase of meter installations. We are planning to install 1600 meters during 2023. You will receive a notification letter and a door hanger prior to the meter installation at your property. We hope to have most of our meters installed by the end of 2026.

Installing meters will sometimes be inconvenient, and we ask for your understanding and patience throughout the process.

For any meter-related questions and information, please do one or more of the following:
